§ 319.37-2a Taxa of regulated plants for planting whose importation is not authorized pending pest risk analysis.

(a) *Determination by the Administrator.* The importation of certain taxa of plants for planting poses a risk of introducing quarantine pests into the United States. Therefore, the importation of these taxa is not authorized pending the completion of a pest risk analysis, except as provided in § 319.37-2(c). Lists of these taxa may be found on the Internet at http://www.aphis.usda.gov/import_export/plants/plant_imports/Q37_nappra.shtml. There are two lists of taxa whose importation is not authorized pending pest risk analysis: A list of taxa of

plants for planting that are quarantine pests, and a list of taxa of plants for planting that are hosts of quarantine pests. For taxa of plants for planting that have been determined to be quarantine pests, the list includes the names of the taxa. For taxa of plants for planting that are hosts of quarantine pests, the list includes the names of the taxa, the foreign places from which the taxa's importation is not authorized, and the quarantine pests of concern.

(b) *Addition of taxa.* A taxon of plants for planting may be added to one of the lists of taxa not authorized for importation pending pest risk analysis under this section as follows:
